Fighting for performance

GBS-16-HP Smoke Ejector

Tempest's GBS-16-HP (Smoke Ejector) is a popular unit for all forms of confined space ventilation, a design that's been used for decades. It's light and small enough to ventilate tight areas yet still built to Tempest's high standard of long lasting durability and reliability. The GBS's 5.5 HP Honda GX 200 engine delivers massive performance out of a compact footprint. Suck the smoke/fumes/particulates out from almost any location, or turn it around and blow them out.
