

# TEMPEST

Fighting for performance

DESIGNED FOR UNIQUE FIRE  
GROUND VENTILATION SCENARIOS

## SPECIAL OPERATIONS (SPVS) ELECTRIC POWER BLOWERS™

The Tempest Special Operations Power Blower™, or SP for short, designed to tackle unique fire ground ventilation scenarios, the SP's specialized air pattern is highly effective when ventilating stairwells, complex, multistory and large structures (>5000ft<sup>2</sup>). This same air pattern is also designed to be deployed 9 to 11 feet from the entry point, providing additional access for personnel.

### Extended Set Back

Most effective at a set back of 9 to 11 feet using Laminar Air Flow, all owing improved personnel access.

### Welded Steel Roll Cage Frame

Welds eliminate the need to continuously maintain/tighten nuts and bolts.

### Laminar Air Flow

The Special Operations (SP) Power Blower™ used a uniquely designed grille and shroud to produce a narrow, high pressure air pattern.

### AirFlex Composition Impeller

Uniquely designed impellers deliver maximum air volume (CFM) from each Tempest Power Blower™.
