

TEMPEST

Fighting for performance

BUILT TOUGH FOR THE INDUSTRIAL MARKET

24-HD-T-EP TALL & EXPLOSION PROOF

The **24-HD-T-EP** is the identical design to the original **24-HD** with an additional 2.5' of height. An extended vertical reach for the **24-HD** was needed in the oil & gas industry in order to ventilate above raised platforms from ground level. At just over 5 feet, the unit features a wide foot print for increased stability and its large 10" and 7" wheels allow for easy mobility.

The Explosion Proof in the name designates that the fan comes with an explosion proof motor. This hazardous locations motor is rated to operate safely in Class I, Groups C & D and Class II, Groups F & G environments. This engine also comes with an explosion proof ON/OFF switch. When dealing with potentially flammable environments, Explosion Proof is crucial.
